

Planning and Analysis for Website- Indian Music

India is a large country with mixture of culture and traditions. Indian music is a diverse tradition shaped by ancient philosophies, regional cultures, and a deep emphasis on melody and rhythm. Here on this website, I am emphasizing two main classical music systems Hindustani in the north and Carnatic in the south and other variety of music styles.

I am planning to make the following pages

- Home page
- About

Subpages

1. Hindustani Music
 2. Carnatic Music
 3. Other styles
- Contact

There will be appropriate information, images, videos, and other particulars on each page according to the heading of the page.
